

Abdulrahman Nasser Al-Zaidan

Computer Engineering Student | AI & Machine Learning Enthusiast

Abha, Saudi Arabia • +966 53 899 7844 • d7alzaidan@gmail.com

EDUCATION

B.Sc. in Computer Engineering

King Khalid University, Abha, Saudi Arabia | Final Year (5th Year) | GPA: 4.36 / 5.00

TECHNICAL SKILLS

Programming: Python (foundational level, actively developing)

Areas of Knowledge: Artificial Intelligence & Machine Learning, Cloud Computing, Computer Networking, Embedded Systems & Arduino, Computer Hardware, Data Science

PROJECTS

Alzheimer's Assistive Smart Helmet — Graduation Project

Capstone Project, King Khalid University

- Designed a wearable smart helmet for Alzheimer's patients featuring real-time face recognition to identify caregivers and family members.
- Integrated medication recognition to help patients correctly identify their prescribed medicine.
- Built a companion mobile application that logs medication data and sends automated reminders and alerts to patients and caregivers.

Smart Collision-Warning Bicycle — Arduino-Based Project

Personal / Academic Project

- Developed a smart bicycle prototype using Arduino and ultrasonic distance sensors to detect nearby obstacles.
- Implemented a visual warning system with LED indicators that shift from green to red as the bicycle approaches a wall or obstacle, improving rider safety awareness.

CERTIFICATIONS & TRAINING

Huawei ICT Academy — Summer Training Program

HCIA-AI • HCIA-Cloud Computing • Cloud Service • HCIA-Datacom • openEuler

Coursera

AI Agents • Machine Learning

Cisco Networking Academy

Computer Hardware • Data Science

LANGUAGES

Arabic — Native | English — Intermediate
